Fictional sample data. Not a real candidate.

Summary

Software engineer building accessible web applications and tested backend services. Interested in reliable APIs and clear user workflows.

Experience

Software Engineering Intern | Example Studio

2025-06 - 2025-09

- Built appointment-conflict validation in a Node.js API and added regression tests for overlapping bookings.
- Replaced an inaccessible date picker with a keyboard-operated booking flow after testing it with the product team.

Education

BSc | Computer Science | Example Technical University

Education date: 2026-06

Skills

TypeScript; React; Node.js; PostgreSQL; Python; Git

Projects

Booking Lab

2026-02 - Present

Technologies: TypeScript, React, Node.js, PostgreSQL

URL: <https://example.com/booking-lab>

- Built an independent appointment scheduler with persistent storage and automated tests for booking conflicts.
- Documented the tradeoff between database constraints and application validation; added a reproducible local demo.
